

PRODUCT DESCRIPTION

A pipe support fabricated from a three inch nominal pipe welded to an eight inch by eight inch base plate and a cap plate with a four inch piece of telescoping strut.

KEY INFORMATION

- Designed to attach typical 1-5/8 MIRO strut frame supports to building structure.
- Install minimum of 8IN roof flashing around stanchion.
- Stanchion is designed for gravity loading only and has not been designed or engineered specific to any project requirements.
- Verification as to suitability toward the application and/or project requirements shall be performed by others.
- MIRO can provide fully designed and engineered project specific supports upon request.
- All parts are hot-dip galvanized.
