

ROOFTOP PIPE SUPPORTS

for GAS LINES, ELECTRICAL CONDUIT, SOLAR LINES,
CONDENSATE, MECHANICAL PIPING, & MORE.

MIRO Industries has been a leader in rooftop support systems since 1982.

We believe that all rooftop support products should last the entire lifetime of a roof, and so we make our supports with the right materials for the job.

We back up all of our products with a 20-year warranty.

“MIRO met and exceeded my needs with their professionalism from the first point of contact through the ordering process. You get the feeling that you are their number one customer no matter how big or small your order may be.”

Tim, Architectural Estimator

PILLOW BLOCK SUPPORTS

Low-cost, basic rooftop support. MIRO Pillow Block supports are an easy-to-install and low-cost solution. The various models can support gas lines, electrical conduit, solar lines, and just about any other mechanical piping. The load-dispersing foot design can be used in conjunction with a spacer to add additional height if required, or can be used on its own. All Pillow Block supports are made of 100% UV-stable polycarbonate.

ROLLER SUPPORTS

Designed specifically for expansion/contraction applications. MIRO Roller Supports allow for longitudinal movement while securely maintaining lateral alignment. These maintenance-free designs use self-lubricating rollers, UV-stable polycarbonate, and hot-dip galvanized hardware. Built to accommodate pipe from 1" to 10", the Roller Series models can lift pipes from 3 7/8" to 18" above the roof surface.

STRUT SUPPORTS

Built for electrical, solar, or other mechanical piping. These models can be set up in widths from a 8" single-base up to a 48" four-base or other custom configurations. With some Strut Series models able to carry loads up to 960 lbs. and at heights up to 18" above the roof, practically any need can be met in the rooftop layout.

HOW TO ORDER MIRO PRODUCTS:

1. Contact your Sales Rep.

If you don't know your Rep you can find yours at miroind.com/rep-locator or call MIRO at **1-800-768-6978**.

2. Review Your Quote.

After learning about your project your Rep will quote you with the easiest, most economical solution that fits your needs.

3. Receive Your Supports.

If the products aren't available locally we'll ship your order directly to you from one of our distribution centers.
